Re: Emergency Generator Installation Project at Mohican Senior Apartments

Mr. Keaney:

I just wanted to take a minute to express my appreciation for the work Diversity Construction Group performed at The Mohican Senior Apartments in New London, CT.

The installation of 250 KW generator into the basement of a historic building presented many challenges including unanticipated issues with the structural integrity of the existing wall and excessive heat build-up within the generator space. Diversity Construction Group met every challenge completing the job within budget and without significant disruption to the residents of Mohican Senior Apartments.

Thank you to Mike Daigle and the entire Diversity Construction Group team for their expertise and professionalism.

Sincerely,

A handwritten signature in blue ink that reads "Donald R. Blakelock".
